KRANJ

SLOVENIA GREEN DESTINATION Platinum

TIPS FOR VISITORS OF KRANJ

"You are a guest on this planet and, as such, are expected to leave it as you found it, or in better condition."
(Marlo Morgan)

Sustainable mobility

Kranj is the city that is the closest to the national airport, it is halfway between Ljubljana and Bled and is easily accessible from anywhere in Slovenia by train or bus. There are sustainable connections in the municipality (public transport, free electric taxi Kranvaj, Car sharing, KRsKOLESOM bike rental system) and also outside the municipality.

Check the sustainable connections to Kranj and choose the way in which you'll to visit this town. We recommend that you travel in an environmentally friendly way and instead of driving you can walk, cycle and use public transport. In this way you not only contribute to reducing your carbon footprint, but also improve your well-being and find a more interesting way to explore our town.

Small steps for big changes

Travel by public transport.

If you arrive here by car, you will be able to find a parking space here.

If you arrive by plane, choose a direct flight if possible. Flying in business class means a greater burden on the environment and your wallet than the economy class.

The old town is small enough to walk.

The countryside around Kranj is wonderful for cycling.

Separation of waste

In Kranj, waste is carefully separated. Separating it reduces its environmental impact and enables further processing. In the old town and in the countryside, there are not only containers for mixed waste, but also so-called ecological islands, where packaging, paper, glass and biological waste can be disposed of separately. That way, you don't have to go to extra lengths as a visitor to keep Kranj clean and tidy. Our advice is to first make sure your waste is kept to a minimum. Buy wisely and only what you need. However, if waste is still generated, dispose of it properly and carefully. Clean is beautiful.

Small steps for big changes

When purchasing household goods, make sure that you buy those without packaging.

Please dispose of waste in trash cans and keep our town clean.

If you happen to be near a so-called ecological island, sort your waste so that it can be recycled.

In the old town there are two shops selling used items as souvenirs and a number of shops selling local produce and products made by local artisans.

Drinking water

Tap water in Kranj is of a very high quality and drinking tap water is healthier and more environmentally friendly than bottled water. You can also treat yourself to tap water when you are taking a walk through the town centre, as there are drinking fountains on the squares Slovenski trg and Trubarjev trg. There, you can quench your thirst immediately or to pour water into your own bottle. Drinking from fountains saves money because you don't have to buy mineral water and at the same time you don't create unnecessary packaging waste. Our advice to visitors to Kranj is that they can without worry treat themselves to a sip of excellent water that comes from the surrounding mountains and so take care of their health and our environment.

Small steps for big changes

Wherever you are staying here, wherever you are having a meal or a drink – tap water is always available.

Use a reusable bottle and fill it with tap water. It is better not to buy bottled water.

There are two drinking fountains in the city where you can get excellent water.

On your walks through the green surroundings of Kranj, you can even taste the water from some of the streams, as it is drinkable.

Silence and stars

Nature speaks softly—let's listen to it.

Let's speak calmly and let's silence the noise to keep peace in tiny corners of cities and nature.

Let's turn off unnecessary lights and use warm, directional lighting.

Let's enjoy the night and look up at the sky—the stars are part of our green story.
